

# Smart Phone&Sell

Increase your remote sales without having a website

## Create a payment link and share it

### Sell on social media

Include a payment link in your posts on social media. As well as giving you likes, your followers will now be able to purchase your products or services.

### Charge for orders via mobile messaging apps

When you receive an order via a message on your mobile, include a payment link in the reply. Ensure the order is paid for before you deliver it.

**Send quotes** with a payment option. Attach a payment link to your e-mail quotes. You can even define the validity date.

### Create special offers for your contacts

Send exclusive offers to your customers. Include the payment link in the e-mail, SMS or mobile message.

## Scan and pay, it's really simple

In just a few steps, you can create a payment QR code via your computer or mobile and print it on your signage or advertising. Your customers will be able to scan the code and complete the order instantly, without having to log onto your website or visit your establishment.

Advertisements on outdoor signage

Promotional leaflets and advertising

Advertising at venues and events

## How does it work? It's very simple

### 1. Create the link or QR code on your mobile or computer

Access the online application. You just have to enter the information on the order or offer, indicate whether there is a stock limit, the link's expiry date and/or whether you're going to ask the buyer for their delivery and billing data.

### 2. Share the link or QR code

If you've created a link, share it with ease by sending it to your customers by e-mail, SMS or mobile messaging or by posting it on social media. If it's a QR code, reproduce it in brochures, printed advertising and on screens, displays, stickers and badges, etc.

### 3. Your customers click or scan

When your customers click on the link or scan the QR code via their mobile, they'll be taken directly to a secure payment page. There they can enter their contact and product delivery details, select the amount, choose the payment method and complete the order.

### 4. You receive notifications and reports

Once the payment has been completed, both you and the customer will receive a notification with the result of the transaction.

## A platform with endless possibilities. Bear in mind...

You don't need to have a website to sell your products or services

You have the option of allowing your customers to choose how much they want to pay

You can define the validity period of your payment orders

Integrated into all the major payment systems, including Bizum

Protected by Banco Sabadell's authentication and anti-fraud systems

Option of setting single or multiple payments
